Work Experience

Network Operations Engineer	Cox Communications	May 2021 - Present
-----------------------------	--------------------	--------------------

- Phoenix, AZ
- Redesigned and built network infrastructure, focusing on network reliability and repairs.
 - Used monitoring tools to identify and fix network problems proactively, keeping systems running smoothly and preventing outages.
 - Trained new team members and created easy-to-follow documentation, helping them quickly learn the ropes and become more effective.
 - Solved complex signal problems for both RF and optical systems, ensuring reliable network performance across different technologies.

Core Technology Technician	Cox Communications	Jan 2012 - May 2021
----------------------------	--------------------	---------------------

- Phoenix, AZ
- Installed and configured residential broadband services including fiber/coax internet, home security systems, cable TV, and phone services.
 - Provided technical troubleshooting for service issues through both remote support and on-site visits.
 - Trained and mentored new technicians on installation procedures and troubleshooting methods.
 - Stayed current with broadband technologies and security systems to ensure quality service delivery.
